

GUARDSMAN FM TROLLEY LUBE

PREMIUM QUALITY FOOD GRADE TROLLEY LUBRICANT

Product Description: GUARDIAN FM TROLLEY LUBE is manufactured from a combination of high quality Synthetic base oils and selected lubricity additive. FM Trolley Oil is designed to ease gliding of trolley assemblies in meat processing plants, while providing good lubrication, minimized oil dripping and rust protection. The lubricant emulsifies readily. That helps clean the trolley hooks.

Features:

- Tasteless, odorless, high viscosity index oil.
- Unique additives provide lubricity and rust protection, antiwear performance and tackiness to minimize oil drippings.
- Lubricity agents promotes free movements for the trolleys without sticking.

Typical Uses:

- Recommended for lubrication of trolley assemblies in meat processing plants.
- Recommended for smooth gliding of trolley assemblies and bearings.
- Complies with Food and Drug Administration (FDA) Federal Regulation 178.3620.

Typical Specifications:

ISO GRADE	46
Gravity, °API	37.1
Flash Point, °C. COC	>220
Pour Point, °C.	-50
Viscosity:	
cSt @ 40°C.	46
VI	>115
Appearance	Bright & Clear
